Abstract

A short high-level overview of the paper, usually 150 words or so.

1 Introduction

This section gives a brief overview the questions you are approaching, summary of the main conclusions, and an overview of the paper.

2 System Overview

A description of the major design, methodological, and algorithmic decisions in your project. It often includes a schematic of the system architecture.

3 Approach

This section should provide the details of the major subcomponents of your system.

4 Results

This section should present the major results of the formal evaluation of your system and components.

5 Discussion

This section will analyze your results in a bit more detail. It is an appropriate location for error analysis and assessment of the strengths and weaknesses of the different components.

6 Conclusion

This section summarizes the main points and provides look ahead. What should happen next?
